Journey at IBM

Joined IBM on 11 August 2015, assuming responsibility for the AIRBUS account's traditional infrastructure portfolio in Paris, and later managed multiple client accounts across Europe, the Middle East and India.

Detailed Role & Project Experience

Country COE Leader & Delivery Partner – Advanced Delivery Transformations (Europe) @ IBM & Kyndryl

Context: Responsible for driving Advanced Delivery Transformations across multiple European accounts to improve delivery maturity, predictability and efficiency.

Key Responsibilities & Initiatives –

- Spearheaded Advanced Delivery Transformation programs across multiple accounts
- Introduced AI-driven delivery intelligence, predictive analytics, and automation frameworks
- Partnered with senior leadership to redefine delivery operating models and manage change
- Established transformation governance, including metrics, scorecards, and health dashboards

Impact –

- Improved delivery maturity and operational efficiency across European accounts
- Enabled measurable business outcomes through standardization and automation

Transformation & Innovation Leader & Delivery Partner – Samlink Account (Finland) @ IBM & Kyndryl

Context: Account supporting multiple end-customer banks, with a focus on compliance, delivery maturity, and automation.

Key Contributions –

- Introduced Kyndryl Advanced Delivery and NWOW; recognized as an NWOW Influencer and conducted multiple Advanced Delivery workshops
- Enabled 8 Core Tools (Distributed) and 9 Core Tools (Mainframe)
- Established 6-Box org. model aligned to Advanced Delivery principles
- Performed quarterly maturity assessments (MET)
- Led Top 10 end-to-end automation assets implementation
- Integrated AIOps capabilities into the account

Delivery Partner Responsibilities –

- Strengthened compliance posture and governance
- Led ScienceLogic implementation to resolve monitoring issues

Impact –

- Improved compliance adherence, automation adoption, and delivery maturity

Detailed Role & Project Experience

Delivery Partner Executive – IPTOR Account (Sweden) @ IBM & Kyndryl

Context: New contract delivery for a Swedish client, involving large-scale infrastructure modernization and delivery transition.

Key Initiatives –

- Established delivery services for a new contract and stabilized operations
- Led migration of infra from traditional data centers to IBM Private Cloud
- Acted as GEO DPE, bridging offshore delivery with EU client stakeholders
- Transitioned delivery operations to nearshore (Brno, Czech Republic)

High-Impact Projects

- Implemented **Consumption Reporting** for accurate monthly invoicing
- Led Disk Performance Project (spinning disks to SSDs), delivering cost savings beyond contract scope
- Automated iSeries monitoring across 172 LPARs (Power Systems 9 & 10)
- Introduced Watson reporting and Monthly Operational Reporting (MOR)
- Authored a comprehensive Procedures Manual for standardized delivery
- Conducted strategic client workshops in Stockholm

Impact –

- Enabled operational stability, cost optimization, and new business value

Transformation & Innovation Leader – Portfolio of Accounts (Denmark & Sweden) @ IBM & Kyndryl

Context: Global leadership role managing transformation for a portfolio of 22 accounts across Denmark and Sweden.

Key Contributions –

- Introduced Kyndryl Advanced Delivery transformation programs
- Initiated Agile@Kyndryl practices (iterations and retrospectives)
- Drove ticket reduction programs, bringing multiple accounts within target thresholds
- Tracked and enabled 8 Core Tools adoption
- Conducted maturity assessments (MET) across multiple quarters

Impact –

- Improved operational discipline, delivery maturity, and automation consistency across the portfolio

Before IBM

Brief of journey prior to joining IBM

- **Head – IT Operations @ Y-Axis:** Owned enterprise IT operations, leading transformation, security, and efficiency initiatives with global teams; delivered Linux modernization, resilient infrastructure, MIS governance, and secure systems. CEO's Award recipient.
- **Business Head @ SYSNET:** Led business and delivery operations, building teams to deliver IT/network architecture, software, and hosting services for hospitals, colleges, and schools.
- **Software Engineer & Programmer:** Delivered customized software solutions, forming a strong foundation for subsequent leadership roles.

Detailed Role & Project Experience

Head – IT Operations @ Y-Axis Solutions Pvt Ltd
